The Tribe and Territory Sex Offender Registry System (TTSORS) is provided by the U.S. Department of Justice’s Office of Sex Offender Sentencing, Monitoring, Apprehending, Registering, and Tracking (SMART) to assist tribes and territories in implementing the Sex Offender Registration and Notification Act (SORNA) registry system requirements. TTSORS was designed to make sex offender registry system setup and maintenance process as efficient as possible. Access to this system is restricted: Only tribe and territory agencies responsible for the management and registration of sex offenders have full access to TTSORS. Read-only access is available to criminal justice-related agencies.

Interested in using TTSORS in your jurisdiction? Email registrysupport@nsopw.gov

Meets SORNA Requirements
TTSORS automatically connects with the Dru Sjodin National Sex Offender Public Website (NSOPW.gov). TTSORS registry systems can—
- Provide community notifications.
- Collect all offender information required by SORNA
- Share information with other SORNA jurisdictions.

Cost-effective
TTSORS is provided free of charge by the SMART Office so jurisdictions do not need to develop or purchase any special IT systems to have a SORNA-compliant registry system—just a computer with internet access.

Customizable
Jurisdictions can choose from numerous public website registry templates, or use their own custom design. Custom offender information fields can be tailored to collect additional information as needed.

Technical Assistance and Support
TTSORS is hosted and managed for the jurisdiction.
- No IT infrastructure burden on the tribe or territory.
- No IT staff required to manage the application.
- Application and server updates are applied automatically.
- Technical assistance is available by phone, email or chat.

Connects Directly to the National Sex Offender Registry
Offender records created in TTSORS can be submitted directly to the FBI’s NSOR, eliminating dual entry and ensuring timeliness, accuracy and completeness of a tribe’s NSOR records. This enhanced TTSORS feature is available to tribes participating in the Tribal Access Program.
